

Table A – Results of Internal Review Committee

Date of Report: June 14, 2005

Water Body Under Evaluation:

Identification #: 1068
Name: Tavern Creek (C)
Length of Segment: 8.0 miles
County (ies): Miller - Pulaski

Use Attainability Analysis Study:

Identification #: 0221
Submitter: DNR Staff - Tucker Fredrickson
Date Received: June 24, 2005
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Completeness Check:

| | | |
|------------------------------------|---|-----------------------------|
| All Required Information Included? | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
| Correct Forms Used? | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
| Forms Signed and Dated? | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
| Comments: | | |

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown
Comments: The stream is already designated for WBCR, therefore the use existed since November 1975.

Is the evaluated use attainable? ☒ Yes ☐ No
Comments: The UAA was conducted in June, 2005, and no WBCR was observed. The stream nearly met the maximum depth criterion in 1 out of 4 sites and met the average depth criterion in 1 out of 4 sites evaluated. No interviews were conducted. Because the stream has overall depth at one site and is already designated for WBCR, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive

Committee Members: Stacia Bax, Ann Crawford, Donna Menown
